MARVELOUS CASES

His Experiments Were the Direct Outcome of Watching the Effect of the Pasteur's Theory.

NEW YORK, Dec. 26 .- Dr. Paul Giber, president of the New York Bacterilogical society and director of the Pasteur institute read an interesting and important paper before the Medical Society of the county of New York at the Academy of Medicine in West Forty-third street tonight, on "A New Agent in the Treatment of Epilepsy.' In it he tells the results of a scientific treatment which he has applied to a class of patients for the first time in this country or elsewhere. The treat-ment is in line with that which has excited interest in scientific medical circles in France, and is a step in advance of the method employed in a some-what similar treatment in Paris. The material used is prepared from the vital organs of the sheep, after it has undergone certain treatment in the laboratory of the Pasteur institute.

The injections were made daily in each side of the patient just above the hip bone. Dr. Gibier said that some two years ago an account was pub-lished in the French medical journals of an epileptic patient treated at the Pasteur institute in Paris for the bite of a mad dog, who was cured of his epilepsy by the anti-rabic injections. More recently other accounts of the cure of the epidemics by injections of the rabic virus had been published and public interest had been aroused in the new treatment.

His Observatious, Refore an opportunity was offered to competent critics to examine the remedy, or the statement of patients who were supposed to be cured, and also without waiting for the test of time as to the reliability of the treatment, it was widely accepted and more than one hypothesis of its mode of action was proposed. Dr. Gibier said that an observation at least was established and that was that some patients had their seizures checked at least temporarily after the injectious of the rable virus. After some remarks upon the cure and the normal functions of the nervous system restored, Dr. Giber said that he had been enabled, by the courtesy of Charles L. Dana, visiting physician at Bellevue nospital, to make number of observations extending over six months of the effect of antirabic inoculations upon persons afflict-

ed with epilepsy. He said that one of the publications Shea, on Main street, where John Da- furnished him with an observation vis, a barkeeper, works. Davis and which seemed to show that as far as a Eyan have had several fights in the cure for epilepsy is concerned, we can lot expect much from the Pasteur in jections.

The patient, a man of 32 years, an epileptic from infancy, bad been treatdays in the intensive form and not wheeled about and returned only did the epileptic convulsions contique but they increased in number.

The Finid. Dr. Gibier said he was not surprised at this failure, masmuch as he had learned indirectly that the cause of the untimely announcement of the cure epilepsy, by the anti-rabic inoculations, was due to the fact that his disease had been temporarily stopped during and after the moculations in two young epileptics who had been bitten by mad dogs and treated at the Pasteur justi-

Gibier ascertained that in the injection given at the Pasteur institute, by which temporary relief seemed to have been afforded to some epileptic patients, the rabic-virus was not injected alone, but in association with a large amount of nervous substance and therefore it occurred to him that if any benefit had been derived from these injections if might be attributed to the servous matter and not the virus. Consequently he determined to test the treatment with the injection of extract grey nervous substance which he pared according to the strictest rules of bacteriology, and in order to avoid fatal accidents, it was perfectly aceptic. The doctor said that the idea of the new treatment was derived from the method proposed by Dr. Brown-Sequard, who thinks that fluids extracted from young and healty organs can give to those who are abnormal Washington, Dec. 26.-For nearly and sende, the attributes of youth and

Dr. Gibier then gave an account of the results he had obtained with the use of his pervine in cases of ep lepsy. In reference to the case of a young Frenchman, who belongs to a family of an epileptic history, Dr. Gibier says: Before being subjected to this treat-ment be was almost continually in a state of epiepuc vertigo, losing consciousness mimentarily several times daily. He had a persistent headache and a very severe serzure at least once weekly. His memory and his mental powers were decreasing steadily and his face had a very bliotic expression. He had been subjected to various forms of treatment without much improvement. # PLENTY OF GOLD.

Secretary Foster Says That the Treasury Contains Enough.

NEW YORK. Dec. 26 .- Secretary of the Treasury Charles Foster left for his home at Fostoria, O., this evening. Before going he said to a reporter that he had had no conference with the bankers here in reference to the export of gold and the condition of the treasury. When asked if there is any danger of panic he said: "None at all. There is no occasion for excitement or alarm in banking circles." "Do you expect to be called upon to issue any bonds to get gold for the treasury between now and March?"

"No, I don't think it will be neces sary. In the three weeks during which \$12,000 have been sent abroad, all of which was taken from the treasury, I have had the offset of \$8,000,000 accumulation. The gold in the treasury when the big shipments began amounted to \$125,000,000. Today it amounts to \$121,000,000.

WHAT A CLERGYMAN FOUND

A Room Flooded With Blood, Two Per-

sons Dead and Two Mora Dying.

WORCESTER, MASS, Dec. 26 .- A horrible triple murder and suicide was discovered at noon today in the upper flat of a tenement house at 31 Tainter street. Henry C. Varnum and his little adopted daughter Florence were found dead. His wife was nearly dead when discovered and died on the way to the hospital and Mrs. Wright, the mother of Mrs. Varnum, now lies in a critical condition. Henry C. Varnum come to this city from Haron, Vt., in September and sought employment as a machinist, which he found in the shop of L. L. Pollard. He then hired the tenement on Tainter street, and sent for his family. The family lived

quietly and to all appearances happily. Today the Rev. E. W. Phillips, pastor of the church attended by the family, called at the house, and receiving no answer to the bell entered the apartments. Opening the door to the bedroom leading off from the kitchen a terrible sight met his eyes. Lying on the bed, covered with blood, were Mr. Varnum and his wife. The man was quite dead, but the woman was breathing heavily.

Died in the Ambulance, In a cot in a corner of the room lay the child, turned over on her face, also dead. Mr. Phillips rushed down stairs and telephoned for the police. When the police arrived the mother, Mrs. Wright, was found in an adjoining room. She was conscious, but not able to speak. The bodies of the man and child were removed by an undertaker, and the two women were carried to the hospital. The younger woman died just as the ambulance stopped at the hospital door.

Mrs. Wright is still unable to speak but she may live. She is about 80 years of age. The weapon with which the awful deed was committed was an iron door hanger, an iron strap about fifteen inches long, headed by a cylin-derical knob. The ins rument weighed fully four pounds. Varnum himself was killed by a stab from a knife, identified as his own. He was cut in the region of the heart. There were no other marks upon the body.
